## Conflict Minerals Statement

DCB does not directly purchase any Conflict Minerals from any source and does not knowingly procure any product containing Conflict Minerals from the Conflict Region. DCB is also committed to working with our suppliers to insure that no Conflict Minerals enter our supply chain.

Our products contain many electronic components. We are committed to keeping conflict minerals out of our production system. As such we only purchase electronic components from US Distributors that state the same commitment to insuring no conflict minerals enter their supply chain. However, we suspect a few of these components might contain small or trace amounts of tantalum, and tin in solder and component leads.

Furthermore, we have reviewed statements from the manufacturers of capacitors with tantalum in them and the manufacturer of our solder which has tin in it and they state that they are also committed to keeping conflict minerals out of their supply chain.
